## Abstracts

The global Photovoltaic Module Frame Glue Applicator market size is expected to reach \$ 1604 million by 2029, rising at a market growth of 3.2% CAGR during the forecast period (2023-2029).

The global photovoltaic industry has high development potential, and the demand for photovoltaic industry chain products is expected to remain high in the next few years. According to data from the company's 'Photovoltaic Research Center', as of the end of 2022, the world's cumulative installed photovoltaic power generation capacity will reach 1,180GW. According to data from the China Photovoltaic Industry Association, the global new photovoltaic installed capacity in 2022 will be approximately 230GW, and the global new photovoltaic installed capacity in 2023 is forecast to be 280-330GW. According to data from the Ministry of Industry and Information Technology, the total output value of China's photovoltaic industry will exceed 1.4 trillion yuan in 2022. From the perspective of production layout, mainland China is still the center of the global photovoltaic industry. According to the International Energy Agency (IEA, International Energy Agency), China's market share in all key production chains of global solar panels exceeds 80%. Among them, silicon wafer production capacity accounts for 98% of the world's total silicon wafer production capacity, cell production capacity accounts for more than 85%, and module production capacity accounts for about 77%. According to data released by the European Photovoltaic Association, the 27 EU countries will add 41.4GW of new photovoltaic installed capacity in 2022, a year-on-year increase of nearly 50%; according to a report from the US Solar Energy Industry Association (SEIA), the United States will add less than 19GW of new photovoltaic installed capacity in 2022, and it is expected that in 2023 Starting from 2020, the average annual growth of new photovoltaic installed capacity will exceed 21%; according to statistics from Fitch and the U.S. Energy Information Administration (EIA), in 2022, Japan's new

photovoltaic installed capacity will be 3.1GW.
