Abstracts

The global Photovoltaic Pump market size is expected to reach \$ 1315 million by 2032, rising at a market growth of 5.9% CAGR during the forecast period (2026-2032).

A Photovoltaic pump (AKA Solar pump) is a pump running on electricity generated by photovoltaic panels or the thermal energy available from collected sunlight as opposed to grid electricity or diesel run water pumps. The operation of solar powered pumps is more economical mainly due to the lower operation and maintenance costs and has less environmental impact than pumps powered by an internal combustion engine (ICE). Solar pumps are useful where grid electricity is unavailable and alternative sources (in particular wind) do not provide sufficient energy.

India is the largest Photovoltaic Pump market with about 37% market share. Europe and China are follower, accounting for about 42% market share.

The key players are LORENTZ, Grundfos, CRI Group, Mono Pumps, Shakti Solar, Tata Power, Bright Solar, USL, Advanced Power, SAJ, Chinalight Solar, CEEG, Quoncion Solar, Komaes Solar, Solartech, MNE, Evergreen Group etc. Top 3 companies occupied about 34% market share.
