Phthalate Resin Coating is a highly durable coating. Another name for Phthalate Resin Coating is Alkyd Resin, and this coating is composed of two main components: phthalic acid and polyalcohols. The choice of polyalcohols, polybasic acids, and denaturants yields resins with widely differing properties, making it possible to create a wide variety of paints for different fields of use. The distinctive properties of this paint are its high weather resistance and the fact that it does not discolor or deteriorate over long periods of time. It also has excellent chemical resistance, minimizing damage caused by chemicals and acidic substances.
