Abstracts

According to our (Global Info Research) latest study, the global Piano Cover market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

A full-cover piano cover covers the entire piano, including the keyboard, lid, lower cabinet, and leg rests, and can more comprehensively protect the piano from dust, sunlight, moisture, and dirt. Full piano covers generally need to be customized because the size and shape of pianos vary widely, so the price of a full cover is usually more expensive than a half cover. The half-cover piano cover only covers part of the piano, usually only the top and sides of the piano, excluding the piano lid and lower sound cabinet. Therefore, the half-cover type has a relatively low degree of protection and is only suitable for pianos that have been placed in a fixed location and are no longer moved frequently.
