Abstracts

The global Piezo Ceramic market size is expected to reach \$ 13560 million by 2032, rising at a market growth of 3.7% CAGR during the forecast period (2026-2032).

The piezoelectric ceramic is a kind of functional ceramic materials which can create electricity when subjected to a mechanical stress. They will also work in reverse, generating a strain by the application of an electric field. In sensors they make it possible to convert forces, pressures and accelerations into electrical signals, and in sonic and ultrasonic transducers and actuators they convert electric voltages into vibrations or deformations.

Global Piezo Ceramic key players include TDK, MURATA, MORGAN, Konghong Corporation, TAIYO YUDEN, etc. Global top five manufacturers hold a share about 50%. Japan is the largest market, with a share about 40%, followed by China, with a share about 20 percent. In terms of product, Lead Magnesium Niobate (PMN) is the largest segment, with a share about 40%. And in terms of application, the largest application is Information & Telecommunication, followed by Industrial & Manufacturing, Automotive, Medical Devices, etc.

This report studies the global Piezo Ceramic production, demand, key manufacturers, and key regions.
