Abstracts

The global Pig Farm Information Management System market size is expected to reach $ 876 million by 2032, rising at a market growth of 8.4% CAGR during the forecast period (2026-2032).

The pig farm information management system is a digital platform based on the Internet of Things, big data and artificial intelligence technologies, which is used to monitor and manage the entire pig farming process in real time. It can automatically collect data on the growth, health, environment and other aspects of the pigs, intelligently analyze the feeding status, optimize key links such as feed feeding, disease warning, and reproduction management, improve farming efficiency, reduce costs, and realize traceable and visualized intelligent farming.

The growth of the Pig Farm Information Management System market is primarily driven by the increasing scale and consolidation of swine production and the rising need for more refined and data-driven farm management. As herd sizes expand and large producers operate multiple farms across different regions, traditional management methods based on paper records, spreadsheets and manual experience are becoming insufficient in terms of data timeliness, accuracy, traceability and cross-farm coordination, encouraging producers to adopt integrated information systems covering animal records, breeding, grow-finish production, feed, veterinary drugs, inventory, costs, labor and business analytics. At the same time, rising feed, labor, biosecurity and energy costs are increasing the importance of digital monitoring of key performance indicators such as sow productivity, feed conversion ratio, mortality and unit production cost, while ongoing animal disease risks are strengthening demand for biosecurity management, health records and end-to-end traceability. In addition, advances in cloud computing, mobile technologies, RFID, IoT sensors and data analytics are enabling pig

farm information systems to evolve from basic record-keeping tools into integrated platforms connecting production, equipment and business management, supporting continued market expansion.

Report Scope

This report studies the global Pig Farm Information Management System demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Pig Farm Information Management System, and provides market size (US$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Pig Farm Information Management System that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Pig Farm Information Management System total market, 2021-2032, (USD Million)

Global Pig Farm Information Management System total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Pig Farm Information Management System total market, key domestic companies, and share, (USD Million)

Global Pig Farm Information Management System revenue by player, revenue and market share 2021-2026, (USD Million)

Global Pig Farm Information Management System total market by Type, CAGR, 2021-2032, (USD Million)

Global Pig Farm Information Management System total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Pig Farm Information Management System market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include ISAGRI, SKOV, Fancom, MTech Systems, AgroVision, Cloudfarms, Nongxin Internet Technology, Shenzhen Shuying Technology, Hotraco Agri, Schauer Agrotronic, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world Pig Farm Information Management System market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US$ Millions), by player, by regions, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
