Abstracts

According to our (Global Info Research) latest study, the global Pilot-operated Aircraft Solenoid Operated Valves market size was valued at US\$ 222 million in 2025 and is forecast to a readjusted size of US\$ 366 million by 2032 with a CAGR of 6.7% during review period.

A pilot-operated aircraft solenoid valve is an electro-hydraulic/pneumatic control component featuring a two-stage 'pilot valve + main valve' structure. It uses low-power electromagnetic force to actuate the pilot spool, which then utilizes medium pressure differential to drive the main valve for large-flow switching or shut-off. This design enables fast, precise control of high-pressure, high-flow fluids (fuel, hydraulic oil, air) under low power consumption, with typical response times below 50 milliseconds. These valves are critical in aircraft environmental control systems, fuel management, landing gear actuation, engine thermal management, and anti-icing systems, requiring operating temperature ranges from -55°C to +150°C and compliance with stringent aviation standards for vibration resistance, electromagnetic compatibility, and sealing integrity. In 2025, the global market size for Pilot-operated Aircraft Solenoid Valves is approximately US 215.8 million, with an annual sales volume of about 1.82 million units. The projected CAGR for the next five years is 6.9%, with a single production line capacity of 120,000-180,000 units per year, and the industry's gross margin is generally around 32%.

This report is a detailed and comprehensive analysis for global Pilot-operated Aircraft Solenoid Operated Valves market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand

trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Pilot-operated Aircraft Solenoid Operated Valves market size and forecasts, in consumption value (\$ Million), sales quantity (K Units), and average selling prices (US\$/Unit), 2021-2032

Global Pilot-operated Aircraft Solenoid Operated Valves market size and forecasts by region and country, in consumption value (\$ Million), sales quantity (K Units), and average selling prices (US\$/Unit), 2021-2032

Global Pilot-operated Aircraft Solenoid Operated Valves market size and forecasts, by Type and by Application, in consumption value (\$ Million), sales quantity (K Units), and average selling prices (US\$/Unit), 2021-2032

Global Pilot-operated Aircraft Solenoid Operated Valves market shares of main players, shipments in revenue (\$ Million), sales quantity (K Units), and ASP (US\$/Unit), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Pilot-operated Aircraft Solenoid Operated Valves

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Pilot-operated Aircraft Solenoid Operated Valves market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Emerson, Magnet

Schultz, Westport Fuel Systems, OMB SALERI, Bitron, ETO GRUPPE, IMI Norgren, B?rkert, EKK Eagle, Hamai Industries, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market Segmentation

Pilot-operated Aircraft Solenoid Operated Valves market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Market segment by Type

Normally Closed (NC) Solenoid Valve

Normally Open (NO) Solenoid Valve

Market segment by Ambient Temperature Grade

-10~80°C

>80°C

Contents

1 MARKET OVERVIEW

1.1 Product Overview and Scope

1.2 Market Estimation Caveats and Base Year

1.3 Market Analysis by Type

1.3.1 Overview: Global Pilot-operated Aircraft Solenoid Operated Valves Consumption Value by Type: 2021 Versus 2025 Versus 2032

1.3.2 Normally Closed (NC) Solenoid Valve

1.3.3 Normally Open (NO) Solenoid Valve

1.4 Market Analysis by Ambient Temperature Grade

1.4.1 Overview: Global Pilot-operated Aircraft Solenoid Operated Valves Consumption Value by Ambient Temperature Grade: 2021 Versus 2025 Versus 2032

1.4.2 -10~80°C

1.4.3 >80°C

1.4.4
