## Abstracts

PIN photodiode is a kind of photo detector. It can convert optical signals into electrical signals.

Scope of the Report:

This report focuses on the PIN Photo Diode in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. From the view of application market, Consumer Electronics is the most active and potential field because of the widely use with the market share of 44.34% in 2016. Although there are big differences between big companies such as First-sensor and new companies, especially in the price of products, customers are still willing to pay more money to achieve products or service with higher quality. Therefore, it will become harder and harder for a new company which doesn't have its own core technology and R&D team to survive in this technology-intensive battle.

The worldwide market for PIN Photo Diode is expected to grow at a CAGR of roughly 1.9% over the next five years, will reach 320 million US\$ in 2023, from 280 million US\$ in 2017, according to a new GIR (Global Info Research) study.
