Lead indium niobate-lead magnesium niobate-lead titanate crystal is a complex polycrystalline material that combines the excellent properties of lead indium niobate (PIN), lead magnesium niobate (PMN), and lead titanate (PT), and has excellent electrical, piezoelectric and dielectric properties. Due to its high electrostriction and low dielectric loss, this crystal is widely used in piezoelectric devices, sensors, ultrasonic transducers and other fields, especially in high-performance acoustic equipment and precision measurement technology. Its multi-component composition makes it excellent in regulating temperature stability and electrical properties.
