A Pin Type Bead Mill is a specialized grinding and dispersion equipment used in various industries for the wet grinding, dispersion, and refinement of particles in liquid suspensions. It employs a unique design featuring high-speed rotating pins or pegs that interact with grinding beads within a grinding chamber. The intense collisions and shear forces generated between the pins, beads, and particles result in efficient particle size reduction, dispersion, and mixing.

Pin type bead mills are known for their ability to achieve fine and consistent particle size reduction, making them valuable tools for producing stable suspensions, emulsions, and dispersions. Their design allows for efficient grinding and mixing of materials in a controlled and reproducible manner, contributing to improved product quality and performance across various applications.
