Pipe belt sander is an electric tool specially used for grinding, polishing and deburring the surface of metal pipes. Its core feature is that it uses a circular abrasive belt to wrap around the guide arm to cover the pipe surface, achieving 360-degree processing without dead angles for round or curved pipes. The equipment is usually equipped with an adjustable tensioning system and support arm to keep the abrasive belt close to the pipe surface during operation, thereby obtaining a uniform polishing effect. Pipe sanders are widely used in the manufacture of stainless steel railings, handrails, furniture pipes, stair handrails, and metal equipment in the food and medical industries, and can handle workpieces of different diameters and curvatures.
