Abstracts

The global Pipe Bevelers market size is expected to reach $ 345 million by 2032, rising at a market growth of 5.0% CAGR during the forecast period (2026-2032).

Pipe Bevelers are mechanical machining systems used to prepare pipe and tube ends for welding by producing controlled V, J, compound, facing, and counterboring profiles. Depending on configuration, they can be portable ID-mounted machines, portable OD-mounted machines, split-frame cutting-and-beveling systems, or stationary CNC machines. Electric, pneumatic, hydraulic, and battery drives are commonly used. These machines remove metal through cold cutting or milling, avoiding a heat-affected zone while improving bevel angle, land width, concentricity, surface finish, and repeatability. They are used on carbon steel, stainless steel, and alloy piping in fabrication shops, construction sites, shutdown maintenance, and pipeline projects. The industrial chain of Pipe Bevelers includes upstream electric motors, pneumatic and hydraulic drive units, gearboxes, spindles, bearings, cutters, carbide inserts, clamps, castings, structural steel, CNC or PLC controls, servo components, and sensors. Midstream manufacturers design and assemble portable and stationary machines, integrate clamping, feeding, drive, machining, and control systems, and provide dedicated tooling and accessories. Downstream demand comes mainly from oil and gas pipelines, petrochemical and refining plants, power generation, nuclear facilities, shipbuilding and marine engineering, boilers, pressure vessels, and industrial pipe fabrication. Distribution, rental, installation, training, maintenance, calibration, and tooling replacement support equipment utilization throughout its service life.

The Pipe Bevelers market is supported by continuing investment in pipeline construction, refinery and chemical maintenance, shipbuilding, power projects, and industrial pipe fabrication. Demand is shifting from manual grinding toward cold-

machining equipment because users increasingly value repeatable weld preparation, safer operation, lower rework, and reduced dependence on skilled labor. Portable machines remain the volume core because they can be deployed in workshops and field maintenance, while stationary and CNC systems capture higher-value demand in pipe spool prefabrication and repetitive production. The competitive structure remains moderately fragmented, with multinational fabrication-tool groups leading premium applications and specialized manufacturers competing through application depth, service networks, and cost efficiency. Chinese manufacturers strengthen price competition in standard portable and stationary configurations, while European and North American suppliers retain advantages in heavy-duty machining, nuclear applications, and global service support. Product development is increasingly focused on faster setup, automatic feeding, digital control, and integrated cutting and beveling.In 2025, global Pipe Bevelers production reached approximately 12,865 units, with an average global market price of around US$18,500 per unit. The gross profit margin of major companies in the industry was between 38% – 52%. In 2025, the global production capacity of Pipe Bevelers was approximately 16,494 units.

Report Scope

This report studies the global Pipe Bevelers production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Pipe Bevelers and provides market size (US$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Pipe Bevelers that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Pipe Bevelers total production and demand, 2021-2032, (Units)

Global Pipe Bevelers total production value, 2021-2032, (USD Million)

Global Pipe Bevelers production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (Units), (based on production site)

Global Pipe Bevelers consumption by region & country, CAGR, 2021-2032 & (Units)

U.S. VS China: Pipe Bevelers domestic production, consumption, key domestic manufacturers and share

Global Pipe Bevelers production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (Units)

Global Pipe Bevelers production by Type, production, value, CAGR, 2021-2032, (USD Million) & (Units)

Global Pipe Bevelers production by Application, production, value, CAGR, 2021-2032, (USD Million) & (Units)

This report profiles key players in the global Pipe Bevelers market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include DWT Handelsgesellschaft für Druckluft-Werkzeug-Technik mbH, G.B.C. Industrial Tools S.p.A., PROTEM SAS, Exact Tools Oy, Copier Machinery B.V., Linsinger Maschinenbau Gesellschaft m.b.H., FE Powertools B.V., PROMOTECH Sp. z o.o., N.KO spol. s r.o., Key Plant Automation Ltd, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Pipe Bevelers market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US$ Millions), volume (production, consumption) & (Units) and average price (K US$/Unit) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
