According to our (Global Info Research) latest study, the global Pipe Insulation market size was valued at US\$ 8307 million in 2025 and is forecast to a readjusted size of US\$ 10946 million by 2032 with a CAGR of 4.5% during review period.

In 2025, global Pipe Insulation capacity is 80 million m³, with production reached approximately 53.80 million m³, with an average global market price of around US\$ 150 per m³. The market gross margin is mainly 30%-40%.

Pipe insulation refers to thermal insulating materials applied to piping systems to control heat transfer between the pipe surface and the surrounding environment. It is used to reduce heat loss in hot service lines, minimize heat gain in chilled or cryogenic systems, prevent condensation, improve energy efficiency, and protect personnel from temperature-related hazards. Pipe insulation may be supplied as pre-formed pipe sections, flexible tubes, boards, or integrated pre-insulated piping systems. Common material types include mineral wool, elastomeric foam, polyurethane foam, phenolic foam, cellular glass, and aerogel-based insulation.

The pipe insulation industry chain consists of upstream raw material suppliers, midstream manufacturers, and downstream end users.

Upstream includes petrochemical companies producing polyurethane (PU), polyisocyanurate (PIR), phenolic resins, and synthetic rubber (NBR/PVC), as well as mineral fiber producers manufacturing rock wool and glass wool. Chemical suppliers provide blowing agents, flame retardants, adhesives, and surface facing materials such as aluminum foil, fiberglass cloth, and protective jacketing. Equipment manufacturers supply foaming lines, fiber-forming systems, molding equipment, cutting machines, and

lamination systems.

Midstream comprises pipe insulation manufacturers that convert raw materials into pipe sections, flexible tubes, rigid boards, or pre-insulated pipe systems. Key production processes include fiber spinning, foaming, curing, molding, machining, and surface lamination. Product differentiation is based on thermal conductivity, fire resistance, density, compressive strength, moisture resistance, and corrosion protection performance.

Downstream users include HVAC contractors, building developers, petrochemical plants, power stations, LNG terminals, industrial processing facilities, district heating networks, and data centers. Market demand is closely linked to construction activity, industrial capital expenditure, energy efficiency regulations, and infrastructure investment.

Global Pipe Insulation key players include Owens Corning, Armacell, Johns Manville, Rockwool, Knauf Insulation, etc. Global top five manufacturers hold a share about 20%.

The global pipe insulation market is expected to grow steadily, driven by increasing demand for energy efficiency, industrial expansion, and stricter building codes. Rising energy costs and decarbonization targets are pushing industries and building owners to reduce thermal losses in heating and cooling systems.

In the building sector, HVAC system upgrades and green building standards such as LEED and BREEAM are encouraging the adoption of higher-performance insulation materials. In industrial applications, petrochemical, LNG, and power generation projects require high-temperature and cryogenic insulation systems with enhanced corrosion resistance and long service life.

Emerging markets in Asia-Pacific, the Middle East, and Africa are experiencing growth due to infrastructure development, urbanization, and industrialization. Meanwhile, developed regions are focusing on retrofitting existing buildings and improving sustainability performance.

Technological trends include low thermal conductivity materials, improved fire resistance, anti-corrosion under insulation (CUI) solutions, and environmentally friendly formulations with reduced emissions.

Overall, the pipe insulation industry is transitioning toward higher performance, longer

durability, and stronger environmental compliance, supported by global energy efficiency policies and infrastructure investment.
