According to our (Global Info Research) latest study, the global Piston market size was valued at USD 10290 million in 2023 and is forecast to a readjusted size of USD 15800 million by 2030 with a CAGR of 6.3% during review period.

The piston is the reciprocating motion in the cylinder body of the automobile engine. The basic structure of piston can be divided into top, head and skirt. The top of the piston is the main part of the combustor, and its shape depends on the combustor form chosen. Most gasoline engines use flat-top piston, which has the advantage of small heat absorption area. Diesel engine piston roof often has a variety of pits, the specific shape, location and size must be in accordance with the diesel engine mixture formation and combustion requirements.

The global piston market is a very fragmented market, with the output share of 17 large enterprises reaching only 62.98% before 2019, and the market size accounting for 66.15%. The top five piston market players are Mahle Group, federal-mogul, Aisin Seiki, Hitachi Automotive Systems, and Rheinmetall Automotive.
