Abstracts

The global Planer Type Milling Machine market size is expected to reach \$ 5729 million by 2032, rising at a market growth of 6.2% CAGR during the forecast period (2026-2032).

In 2025, global Planer Type Milling Machine production reached approximately 7k units , with an average global market price of around US\$500k per unit.

A planer type milling machine, also known as a gantry milling machine, is a large, high-rigidity machine tool featuring a gantry structure composed of double columns and a crossbeam. The worktable moves linearly while the milling head mounted on the crossbeam performs multi-axis machining. Developed from traditional planer machines, it replaces single-point cutting tools with high-speed rotating milling spindles, enabling efficient machining of large flat surfaces, complex contours, and heavy components. Compared with conventional milling machines, it offers larger machining capacity, higher load capability, and multi-face processing, making it essential for aerospace, energy equipment, mold manufacturing, and heavy machinery industries.

Upstream of the planer type milling machine industry includes casting suppliers, CNC systems and servo providers such as Siemens and FANUC, and precision component manufacturers such as THK. The midstream consists of machine tool manufacturers such as DMG MORI, Mazak, and Fives Group. Downstream applications include aerospace (e.g., Boeing), automotive (e.g., Toyota), energy equipment, and mold manufacturing.

The planer type milling machine market is evolving steadily, driven by the upgrade of high-end manufacturing and increasing demand for large and complex components in

aerospace, energy, and precision mold industries. Key trends include higher speed and precision, multi-axis machining, and intelligent manufacturing, along with growing demand for large-scale and customized machines. However, high investment costs, technical barriers, and cyclical fluctuations in downstream industries pose challenges. Overall, it is a technology-driven segment within high-end equipment manufacturing with stable demand and intensifying competition.

This report studies the global Planer Type Milling Machine production, demand, key manufacturers, and key regions.
