The global Planetary Roller Screw for Industrial market size is expected to reach \$ 315 million by 2032, rising at a market growth of 18.6% CAGR during the forecast period (2026-2032).

A planetary roller screw is a type of mechanical actuator widely used in industrial applications for converting rotary motion into linear motion with high precision and efficiency. It consists of multiple threaded rollers that circulate around a threaded shaft like planets revolving around a sun, enabling smooth and precise linear movement. In 2025, global Planetary Roller Screw for Industrial production reached approximately 46.4 k sets with an average global market price of around US\$2000 per set.

The future industrial Planetary Roller Screw industry will exhibit parallel development trends towards high-end capabilities, customization, and intelligence. With the rapid growth in demand for high-stiffness and high-reliability linear transmission from industrial robots, humanoid robots, and high-end equipment, Planetary Roller Screws are transitioning from niche high-end technology to large-scale application. Enterprises will focus on enhancing dynamic load capacity, fatigue life, and compact design, while standardized and highly customized products will coexist for a long time to meet the needs of aerospace, military, and other special fields. At the technical level, the application of lightweight materials and the integration of intelligent sensing functions will become priorities, driving products towards intelligent evolution such as condition monitoring and predictive maintenance. Although overseas enterprises currently occupy the major market share, domestic manufacturers are gradually improving performance and customization capabilities through technological innovation, offering broad space for import substitution. The industry as a whole will accelerate from the technology introduction phase into the growth phase, and collaborative optimization of the upstream

and downstream supply chains will become the key to increasing corporate revenue and profits.
