## Abstracts

According to our (Global Info Research) latest study, the global Plant Bakuchiol market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Bakuchiol is a natural, plant-derived alternative to a retinoid or retinol. Bakuchiol has been shown to mimic the action of retinol in a variety of in vitro tests because it's a molecule very similar in structure. Like retinol, bakuchiol is a skin-cell growth stimulator and an antioxidant that helps regenerate cells. The natural plant compound has been shown to be gentler than retinol, with similar anti-ageing benefits. Because of the lack of skin irritation, Bakuchiol is appropriate for all skin types and could be used during pregnancy.
