Abstracts

The global Plant Bakuchiol market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Bakuchiol is a natural, plant-derived alternative to a retinoid or retinol. Bakuchiol has been shown to mimic the action of retinol in a variety of in vitro tests because it's a molecule very similar in structure. Like retinol, bakuchiol is a skin-cell growth stimulator and an antioxidant that helps regenerate cells. The natural plant compound has been shown to be gentler than retinol, with similar anti-ageing benefits. Because of the lack of skin irritation, Bakuchiol is appropriate for all skin types and could be used during pregnancy.

This report studies the global Plant Bakuchiol production, demand, key manufacturers, and key regions.
