Abstracts

The global Plant Based Cheese market size is expected to reach \$ 2661.9 million by 2029, rising at a market growth of 7.8% CAGR during the forecast period (2023-2029).

During the projection period, the vegan cheese market will develop due to an increase in the number of people who are flexitarian or vegan, as well as a rise in the number of people who are opposed to animal killing and concerned about their welfare. Incorporating vegan cheese into one's diet can improve one's physiological status. Furthermore, folks who are lactose intolerant or allergic to dairy are increasingly gravitating toward plant-based diets. Plant-based foods, like dairy products, give protein, vitamins, and carbs. With the rapid rise in vegan population, growth in the global vegan cheese market is on the cards. This will directly influence the sales of plant-based cheese during the upcoming period.

Plant Based Cheese is a dairy substitute that is made completely of plant-based ingredients. Vegan cheese is made from a variety of plant-based milks, including soy milk, coconut milk, peanut milk, almond milk, and oat milk.
