## Abstracts

The global Plant-based-protein Meat market size is expected to reach \$ 2606 million by 2032, rising at a market growth of 4.9% CAGR during the forecast period (2026-2032). Plant-based-protein Meat is made from plants such as soy. It is specially designed and made to look, taste and cook like traditional meat. Artificial meat can be burger patties, chicken nuggets, or even minced meat and sausages. As it becomes more and more popular, these vegetable-based alternatives are shaking up the meat industry and subverting everything we know about veggie burgers.

Different manufacturers have different product formulations. Different types of protein have different tastes. Therefore, the source of plant protein in plant-based meat is basically a composite formula composed of soy protein, faba bean protein, chickpea protein, etc.

From the perspective of product type and technology, meat products occupy the largest market share in the world, accounting for 83.5% of the total plant protein meat production share. This is because in terms of plant protein meat production technology, most companies, especially Chinese companies, only produce plant protein meat in the stage of meat-like products, and in the field of manufacturing large-block plant protein meat, the technology is not advanced enough to catch up with the level of Beyond Meat in the United States.

From the perspective of manufacturers, the core plant protein meat manufacturers worldwide mainly include Beyond Meat, Impossible Foods, Turtle Island Foods, Maple Leaf. The first-tier manufacturers in the world mainly include Beyond Meat, Kellanova, Impossible Foods and Maple Leaf, and the first-tier manufacturers account for about 55% of the market share; the second-tier manufacturers include Yves Veggie Cuisine, Monde Nissin and Fry Group Foods, which account for a total of 30%.

This report studies the global Plant-based-protein Meat production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Plant-based-protein Meat and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
