North America is mainly used for food additives. Plant Extracts are widely used in Europe for the medicine industry. For the emerging market, China is expected to have high consumption in the next few years.

For the demand of high concentration and high quality Plant Extracts, the price is expected to increase but on a small scale.

Briefly speaking, in the next few years, the Plant Extracts industry will still be a highly energetic industry. Although sales of Plant Extracts brought a lot of opportunities, the study group recommends new entrants who are just having money but without technical advantage and downstream support, do not enter into the Plant Extracts field hastily.

The worldwide market for Plant Extracts is expected to grow at a CAGR of roughly 15.2% over the next five years, will reach 24600 million US\$ in 2023, from 10500 million US\$ in 2017, according to a new GIR (Global Info Research) study.
