According to our (Global Info Research) latest study, the global Plasma Protein Therapeutics market size was valued at US\$ 36350 million in 2024 and is forecast to a readjusted size of USD 59680 million by 2031 with a CAGR of 7.4% during review period.

Plasma Protein Therapeutics is use blood products to treat disease. Human blood plasma is nature's raw material for dozens of life-saving treatments and medications. By extracting the active ingredients and disinfection, people get related preparations from blood plasma, which is called blood product.

The plasma protein therapeutics market is driven by the increasing prevalence of rare and chronic diseases such as hemophilia, primary immunodeficiency, and autoimmune disorders, which require life-saving plasma-derived treatments. Advances in plasma fractionation techniques and the growing demand for immunoglobulins, albumin, and clotting factors are further fueling market growth. Additionally, improvements in diagnostic technologies have led to earlier detection and treatment of these conditions, expanding the patient pool for plasma protein therapies. Increasing awareness and access to these treatments in developing regions are also contributing to market expansion. A significant challenge in the plasma protein therapeutics market is the limited availability of plasma due to the complex and time-consuming process of plasma collection and fractionation. This often results in supply shortages, which can affect patient access to essential therapies. The high cost of plasma protein therapies, due to the labor-intensive production process and stringent regulatory requirements, also poses a barrier to treatment affordability. Furthermore, the market faces increasing competition from recombinant therapies, which are being developed as alternatives to

plasma-derived products, potentially impacting market share.

Takeda, CSL and Grifols are the leaders of the Plasma Protein Therapeutics industry. The top five manufacturers held 73.28% of the market. North America is the major region of the global market, which takes about 40% market share.
