## Abstracts

According to our (Global Info Research) latest study, the global Plasma Welding Machines market size was valued at USD 62 million in 2023 and is forecast to a readjusted size of USD 80 million by 2030 with a CAGR of 3.8% during review period.

Plasma Welding Machines market, Plasma welding is very similar to TIG welding as the arc is formed between a pointed tungsten electrode and the workpiece. However, by positioning the electrode within the body of the torch, the plasma arc can be separated from the shielding gas envelope. Plasma is then forced through a fine-bore copper nozzle which constricts the arc. Plasma Welding Machines are the device used for Plasma welding. The major components of the machines are power source, torch, ETC.
