Abstracts

Plastics additives are all chemicals which are used to polymerize, process or to modify end use properties of plastics.

According to our (Global Info Research) latest study, the global Plastic Additive market size was valued at USD 7464 million in 2022 and is forecast to a readjusted size of USD 10700 million by 2029 with a CAGR of 5.3% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Rapidly increasing usage of plastics in industrial manufacturing, construction, automotive and mechanical engineering coupled with increasing cost of natural metal are the major factors driving the growth of plastic additives market. Increasing costs of natural metals has increased preferences for plastic additives. Moreover, augmented household applications and lower cost of plastic products are likely to boost the growth of this market over the forecast period. On the other hand, the global plastic additives market is restrained by stringent government regulation on limited usage of plastic and environmental policies.
