The global Plastic Bottle Cap Torque Testing Machine market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

According to our “Construction Machinery” research center, sales of construction machinery in Europe increased by 24% in 2021, and in 2022 the construction machinery revenue in Europe was about US\$ 22 billion, while the US market sold about \$36 billion in construction machinery in 2022. China's construction machinery has complete categories and outstanding advantages, with 20 categories, 109 groups, 450 models, 1090 series and tens of thousands of models of product equipment. By the end of 2021, the number of major products of construction machinery in China was about 5.61 million to 6.08 million units. According to our “Construction Machinery” research center, the total sales of the top 50 global construction machinery manufacturers in 2022 reached US\$ 220 billion. And Asian companies occupied an absolute advantage, accounting for 50% of revenue, followed by Europe and North America, accounting for 26% and 23%.

Plastic tensile testing machine adopts mechatronics design, mainly composed of load cell, transmitter, microprocessor, load driving mechanism, computer and color inkjet printer. It can test the tensile, compression, bending and other items of non-metallic and polymer materials, and can meet international standards and industry standards such as GB, ISO, JIS, ASTM, DIN, JG, JT, YB, QB, YD, QC, etc. , The whole process of data acquisition is not divided into blocks. The imported servo motor and the self-developed synchronous belt reduction system drive the ball screw to move the entire machine up and down. The characteristics of balance and stability greatly prolong the service life and efficiency of the testing machine; Connect to a computer to achieve full computer control and print standard test reports.
