The global Plastic Components for Auto Exterior market size is expected to reach \$ 75608 million by 2032, rising at a market growth of 2.7% CAGR during the forecast period (2026-2032).

Automotive exterior plastic components refer to all external parts made of plastic, excluding the vehicle's frame. They are primarily responsible for protecting the vehicle body, optimizing aerodynamics, and enhancing the vehicle's aesthetics and ease of use.

The automotive interior and exterior plastic components market has matured after years of development, driven by the automotive industry's continuous pursuit of lightweighting, cost-effectiveness, and design flexibility. As a key component of the automotive 'plastics instead of steel' strategy, plastic components significantly reduce overall vehicle weight and manufacturing costs through integrated design (such as the integration of the dashboard and center console) and modular production.
