According to our (Global Info Research) latest study, the global Plastic Pallet market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

A pallet, sometimes inaccurately called a skid (a skid has no bottom deck boards), is a flat transport structure that supports goods in a stable fashion while being lifted by a forklift, pallet jack, front loader, work saver, or other jacking device, or a crane. A pallet is the structural foundation of a unit load which allows handling and storage efficiencies. Goods or shipping containers are often placed on a pallet secured with strapping, stretch wrap or shrink wrap and shipped. Since its invention in the twentieth century, its use has dramatically supplanted older forms of crating like the wooden box and the wooden barrel, as it works well with modern packaging like corrugated boxes and intermodal containers commonly used for bulk shipping. This report is focus on Plastic Pallet.

In Vietnam, the key players of plastic pallet include NPC VINA, Duy Tan, Pallet Moi Truong xanh, Long Thanh Plastic Co., Ltd., Hanoi Plastics, etc. Top five manufacturers hold a share over 75%. In terms of product, HDPE is the largest segment, with a share over 54%. And in terms of application, the largest application is food industry, with a share over 27%.
