## Abstracts

The global Plastic Pallets market size is expected to reach \$ 12130 million by 2032, rising at a market growth of 6.8% CAGR during the forecast period (2026-2032).

A pallet, sometimes inaccurately called a skid (a skid has no bottom deck boards), is a flat transport structure that supports goods in a stable fashion while being lifted by a forklift, pallet jack, front loader, work saver, or other jacking device, or a crane. A pallet is the structural foundation of a unit load which allows handling and storage efficiencies. Goods or shipping containers are often placed on a pallet secured with strapping, stretch wrap or shrink wrap and shipped. Since its invention in the twentieth century, its use has dramatically supplanted older forms of crating like the wooden box and the wooden barrel, as it works well with modern packaging like corrugated boxes and intermodal containers commonly used for bulk shipping. This report is focus on Plastic Pallet.

Global plastic pallets key players include Brambles, Craemer Holding, Langjia, ORBIS, Rehrig Pacific, etc. Global top five manufacturers hold a share nearly 35%.

China is the largest market, with a share about 30%, followed by United States, and Europe, both have a share about 40 percent.

In terms of product, HDPE Plastic Pallets is the largest segment, with a share over 50%. And in terms of application, the largest application is Food Industrial, followed by Electronics Industrial, Medical Industrial, Chemical Industrial, etc.

This report studies the global Plastic Pallets production, demand, key manufacturers, and key regions.
