The global Plastic Roof Cement market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Plastic roof cement, also known as plastic flashing cement or plastic roof patch, is a type of roofing material used for sealing and repairing roofs. It is a thick, sticky substance typically made from a combination of asphalt/bitumen, petroleum solvents, and various reinforcing fibers. It is used to fill and seal small cracks, gaps, and holes in roofing materials, including asphalt shingles, metal roofs, and flat roofs. Plastic roof cement provides a waterproof barrier, preventing water penetration and protecting the underlying roof structure from damage. It can be applied with a trowel or putty knife and is typically black or dark gray in color.

This report studies the global Plastic Roof Cement production, demand, key manufacturers, and key regions.
