Plastic strapping is a high tensile strength banding material that is used in a wide variety of packaging applications including carton closing, bundling, plastic tote security, and tying together (unitizing) both palletized and unpalletized materials for in-plant transfer and shipment. Plastic strapping is economical, offers a unique combination of high strength with elasticity, is material-efficient and recyclable. Plastic straps are moisture-resistant and are effective across a wide temperature range. Plastic strapping can be used for outdoor storage for limited periods with UV stable grades available where extended environmental stability is needed.
