Abstracts

The global Plastic Waste Management market size is expected to reach \$ 49850 million by 2032, rising at a market growth of 4.2% CAGR during the forecast period (2026-2032).

Plastic waste management is a collective term for various approaches and strategies used to recycle plastic materials that would otherwise be dumped into landfills, or bodies of water, or otherwise contaminate the environment. The idea behind this type of waste management is to utilize those discarded materials to manufacture new plastic products without the need to actually generate additional plastic materials. Doing so can help lower production costs as well as protect the environment.

Plastic Waste Management companies include Veolia Environnement, Suez Environnement, Waste Management, Republic Services, Stericycle, Clean Harbors, ADS Waste Holdings, Progressive Waste Solutions and Covanta Holding. Veolia Environnement owns the biggest plastic waste treatment capacity, with about 1.5% market shares. North America is the largest consumption place, with a consumption market share nearly 25%.

This report studies the global Plastic Waste Management production, demand, key manufacturers, and key regions.
