According to our (Global Info Research) latest study, the global Platelet Aggregation Devices market size was valued at USD 278.6 million in 2023 and is forecast to a readjusted size of USD 592.7 million by 2030 with a CAGR of 11.4% during review period.

Platelets are blood cells responsible for forming clots to stop bleeding from the body. When a blood vessel is injured, platelets dash to that location and form clots at the injured place and prevent blood loss. For accurate formation of clotting appropriate number of platelets are required. Platelet aggregation systems (also referred to as an aggregometer) can be used to determine how well platelets stick together. Such a test measures platelet aggregation with the use of a platelet antagonist, such as ADP, thrombin, and ristocetin.

According to our research, the global market for medical devices is estimated at US\$ 603 billion in the year 2023, and will be growing at a CAGR of 5% during next six years.
