Abstracts

According to our (Global Info Research) latest study, the global Plier Wrench market size was valued at US\$ 711 million in 2025 and is forecast to a readjusted size of US\$ 945 million by 2032 with a CAGR of 4.2% during review period.

A plier wrench is a versatile tool designed for gripping and tightening bolts and nuts. It is similar to water pump pliers, which are primarily used for plumbing maintenance but offers easier adjustability in the opening width compared to a monkey wrench. Unlike standard wrenches, plier wrenches apply force on two surfaces, reducing the likelihood of damaging the corners of bolts or nuts due to their firm grip.

Plier wrenches combine the gripping capability of pliers with the tightening functionality of monkey wrenches and standard wrenches. They feature an adjustable opening width like monkey wrenches, but their flat gripping surfaces allow for secure tightening of bolts and nuts without corner damage.
