A pneumatic actuator converts energy by compressed air into mechanical motion. The motion can be rotary or linear, depending on the type of actuator. The research team studied pneumatic actuator that applied in the field of control valve market, in this report.

Scope of the Report:

This report focuses on the Pneumatic Actuator in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Globally, the pneumatic actuator industry market is not that concentrated as the manufacturing technology of pneumatic actuator is relatively much more mature than some high-tech equipments. But some enterprises are still well-known for the wonderful performance of their pneumatic actuators and related services. At the same time, some countries such as Italy, Germany, Japan and USA are remarkable in the global pneumatic actuator industry because of their market share and technology status of pneumatic actuator.

The product Average Price declined in the past few years due to the market competition and the Average Price will keep the trend in the few future years due to most of Chinese manufacturers will enter the industry.

Although the market competition of pneumatic actuator is fierce globally, there are many enterprises can obtain considerable profit from the manufacturing and marketing of pneumatic actuator and that is the reason that we believe there will also be enterprises enter this market. But it is suggested that enterprises those have plans to enter this industry have careful analysis of this market and the advantages or disadvantages of themselves.

The worldwide market for Pneumatic Actuator is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
