Abstracts

According to our (Global Info Research) latest study, the global Pneumatic Centric Gripper market size was valued at US\$ 903 million in 2025 and is forecast to a readjusted size of US\$ 1374 million by 2032 with a CAGR of 6.2% during review period.

In 2025, global sales of pneumatic centric grippers were approximately 720,000 units, with an average price of approximately US\$1,220 per unit and a gross profit margin of approximately 25%–33%. Pneumatic centric grippers are pneumatic grippers that achieve "centripetal clamping" through the radial synchronous motion of three or more jaws. They typically consist of a body housing (aluminum alloy or steel), a wedge or curved cam drive mechanism, radial sliders and gripping jaws, guides and seals, a drive unit (cylinder, spring return, or built-in motor/servo module), position sensors, and mounting interfaces. Common parameters include: clamping diameter range of 5–150 mm (extendable to over 300 mm for heavy-duty and special-purpose models), single-jaw clamping force from tens of Newtons to thousands of Newtons, repeatability of 0.01–0.05 mm, stroke of 2–20 mm, protection rating of IP40–IP67, and a working life designed for 10 million cycles. In terms of typical usage: a typical automotive powertrain machining and assembly line is equipped with 80–250 pneumatic centric grippers (distributed across machine tool loading/unloading, transfer, inspection, and clamping stations); a typical automatic motor stator/rotor assembly line commonly uses 20–80; and a flexible production line for 3C precision turning parts has a total of 30–60 grippers deployed across gantry robots, articulated robots, and measurement stations. The upstream mainly relies on alloy steel and aluminum alloy bars/forgings, hardened guides and sliders, needle/ball bearings and linear guides, seals and springs, and small cylinders or motor/encoder assemblies; the downstream focuses on robot and gantry robot system integrators, machine tool and automation line OEMs, automotive and

motor/reducer manufacturers, and 3C and precision manufacturing companies.
