Abstracts

According to our (Global Info Research) latest study, the global Pneumatically Isolated Optical Tables market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Pneumatic optical tables (sometimes called air tables) use pressurised air supports, which provide better isolation from floor vibrations than rigid supports. Most vibration sources in a lab are in this frequency range, so these stands are suitable for many labs. The pressurised support can be in the form of a frame with casters or four individual cylindrical legs.
