Police radars mainly include Dash-mount Police Radars and Handheld Police Radar Guns. Dash-mount police radars are vehicle-mounted radar systems installed on the dashboard, windshield, or rear window of police vehicles to measure the speed of other vehicles. These radars operate using Doppler radar technology, emitting radio waves and analyzing their reflections from moving vehicles to determine their speed. Handheld police radar guns are portable, radar-based devices used by law enforcement officers to manually measure the speed of moving vehicles. Guns also use Doppler radar and are typically battery-powered, allowing officers to aim and monitor speed from roadside locations or stationary vehicles.
