## Abstracts

The global Polio Vaccine market size is expected to reach \$ 1086 million by 2032, rising at a market growth of 4.1% CAGR during the forecast period (2026-2032).

Polio vaccines are vaccines used to prevent poliomyelitis. There are two types: one that uses inactivated poliovirus and is given by injection, and one that uses weakened poliovirus and is given by mouth.

The World Health Organization recommends all children be fully vaccinated against polio. The two vaccines have eliminated polio from most of the world, and reduced the number of cases reported each year from an estimated 350,000 in 1988 to 37 in 2016.

Sanofi, GSK and Serum Institute are the top 3 players of Polio Vaccine with about 91% market shares.

This report studies the global Polio Vaccine production, demand, key manufacturers, and key regions.
