A poly tube bag printer is a machine that produces poly bags by printing, heat welding, and cutting polyethylene sheets. These printers are used for packaging and wrapping, utilizing both low-density (LDPE) and high-density (HDPE) polyethylene, each chosen for their specific properties like strength and transparency.

These printers employ thermal transfer and gravure printing methods, making them suitable for printing detailed characters, barcodes, and symbols. They are versatile for various industries and can handle mass production. Some large printers can perform the entire process, from feeding materials to printing, welding, and cutting.
