Polyalphaolefin (PAO) grease is a high-performance grease made of polyalphaolefin as base oil, thickener and additives. PAO base oil has excellent thermal stability, oxidation resistance, low temperature fluidity and shear resistance, so PAO grease can still provide reliable lubrication effect in extreme temperature environments (such as high or low temperature). It is widely used in bearings, gears and other key components in the fields of automobiles, industrial machinery, aviation, etc., which can reduce friction and wear and extend the service life of equipment.
