## **Abstracts**

This report studies the Polyalphaolefin market, Poly Alpha Olefin or PAO is a 100% synthetic base oil stock used in the production of high performance lubricants. PAO's typically have a higher viscosity index than mineral oils and better oxidative stability. Also PAO has many advantages, such as high viscosity index and excellent lubricity, high flash point and low volatility, outstanding low-temperature fluidity for enhanced blend flexibility, excellent oxidant resistance, excellent shear stability and hydrolysis, compatible with mineral oils and esters, extended drain and improved fuel economy.
