Abstracts

Aspartic acid reacts with an aliphatic polyisocyanate to form polyaspartic acid. Polyaspartic acid technology is different from traditional polyurethanes because these polyaspartic acid esters can be used for various end uses with simple handling. Coating systems such as epoxy and polyurethane take longer to cure, while polyaspartic acid coatings cure faster. These coatings can also be easily formulated for temperatures below freezing. Polyaspartic acid coatings are used in bridges, floors, OEM coatings, automotive repairs, wind turbines and pipelines in the oil and gas industry.

According to our (Global Info Research) latest study, the global Polyaspartic Acid Coating market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.
