Abstracts

The global Polyaspartic Resin market size is expected to reach \$ 1280 million by 2032, rising at a market growth of 7.9% CAGR during the forecast period (2026-2032).

Polyaspartic resin is an amine-functional, NH-reactive co-reactant designed to react with aliphatic polyisocyanates to form polyaspartic polyurea or modified polyurethane networks. It enables high-solids to solvent-free 2K coatings with fast cure, strong abrasion resistance, and excellent outdoor weathering and color stability, making it widely used in protective coatings, flooring, waterproofing, and sealant/adhesive formulations. Covestro's Desmophen® NH portfolio is a representative example of such polyaspartic (NH-reactive) resins used to formulate very high-solids / near-zero-VOC 2K PU coatings. In 2025, global polyaspartic resin sales reached approximately 120 kilotons, with an average price of 6,000 US\$/ton.

Demand for polyaspartic resins is primarily driven by (i) fast-return construction and maintenance projects that value rapid cure and short downtime (industrial flooring, bridges, marine and steel structures), (ii) regulatory and customer push toward high-solids or near-zero-VOC coating systems where polyaspartic chemistry provides performance without heavy solvent reliance, and (iii) increasing performance expectations for outdoor durability?UV/color stability and abrasion resistance?especially for premium protective topcoats. These drivers align with how polyaspartic technology is positioned for very high-solids/low-VOC 2K PU coatings.

This report studies the global Polyaspartic Resin production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Polyaspartic Resin and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
