Abstracts

Polybutadiene is a synthetic rubber. Polybutadiene rubber is a polymer formed from the polymerization of the monomer 1,3-butadiene. Polybutadiene has a high resistance to wear and is used especially in the manufacture of tires, which consumes about 70% of the production. Another 25% is used as an additive to improve the toughness (impact resistance) of plastics such as polystyrene and acrylonitrile butadiene styrene (ABS).

Scope of the Report:

This report focuses on the Polybutadiene in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Asia Pacific is estimated to dominate the polybutadiene market, owing to the rising demand for polybutadiene driven by its increased use in end-use industries. Europe is the second-largest consumer of polybutadiene, globally. The market in this region is mainly driven by the growth in the automotive industry.

The tire application segment is estimated to lead the polybutadiene market, and it is also projected to witness the highest growth during the forecast period, owing to the growth of the automotive industry.

The worldwide market for Polybutadiene is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
