Carrier Tape refers to a tape-shaped product used in the field of electronic packaging. It has a specific thickness and is evenly distributed along its length with holes for fixing electronic components and positioning holes for index positioning. Carrier tape is mainly used in the electronic component installation industry. Used in conjunction with cover tape (upper tape), electronic components such as resistors, capacitors, triodes, and diodes are carried in the carrier tape. The cover tape is sealed on the carrier tape to form a closed package to protect the electronic devices.
