Abstracts

The global Polycarbonate Resin market size is expected to reach \$ 22860 million by 2032, rising at a market growth of 6.0% CAGR during the forecast period (2026-2032).

Polycarbonates (PC) are a group of thermoplastic polymers containing carbonate groups in their chemical structures. Polycarbonates used in engineering are strong, tough materials, and some grades are optically transparent. They are easily worked, molded, and thermoformed. Because of these properties, polycarbonates find many applications.

Polycarbonate (PC) Resin is mainly classified into the following types: phosgene and non-phosgene. Phosgene is the most widely used type which takes up about 60% of the total sales.

Polycarbonate (PC) Resin has wide range of applications, such as consumer electronics, construction, automotive, etc., and consumer electronics was the most widely used area which took up about 49% of the global total.

APAC is the largest region of Polycarbonate (PC) Resin in the world in the past few years and it will keep increasing in the next few years. APAC market took up about 71.8% the global market.

In developed countries, the market concentration is relatively high, but in developing countries, such as China, the market concentration is very low, from 2018 to 2023, there are many small players in China put the PC into production.

Covestro, SABIC, Mitsubishi, Lotte Chemical, Teijin Limited, Idemitsu Kosan, etc. are

the key suppliers in the global Polycarbonate (PC) Resin market. Top 5 took up about 2/3 of the global market.

This report studies the global Polycarbonate Resin production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Polycarbonate Resin and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
