Abstracts

According to our (Global Info Research) latest study, the global Polydiethylsiloxane market size was valued at US$ 4.38 million in 2025 and is forecast to a readjusted size of US$ 5.80 million by 2032 with a CAGR of 4.1% during review period.

In 2025, global sales volume of polydiethylsiloxane was approximately 152 tons, with a mainstream enterprise-level average selling price of about USD 28/kg. The gross margin of major manufacturers in the industry was approximately 35%?55%.

Polydiethylsiloxane, abbreviated as PDES, has a CAS number of 63148-61-8. It is a specialty organosilicon polymer fluid mainly composed of diethylsiloxane repeating units. Compared with the commonly used polydimethylsiloxane, its side groups are ethyl groups instead of methyl groups, which gives it certain differences in low-temperature fluidity, lubricity, hydrophobicity and compatibility with organic phases.

The upstream raw materials of polydiethylsiloxane mainly include ethyl chlorosilanes, siloxane intermediates, end-capping agents, catalysts and refining auxiliaries. Its production process requires strict control over polymerization, removal of low-molecular-weight components, viscosity stability and impurity levels. Downstream demand is mainly concentrated in aerospace, electronic and electrical, personal care, industrial lubrication and precision instrument applications. It can be used in specialty lubricating oil, damping fluid, insulating fluid, skin-feel modifiers and silicone oil formulations requiring strong low-temperature performance.

This report is a detailed and comprehensive analysis for global Polydiethylsiloxane market. Both quantitative and qualitative analyses are presented by manufacturers, by
