Abstracts

The global Polyether Acrylic Resin market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Polyether acrylate is a kind of photocurable coating oligomer, mainly referring to acrylates with polyethylene glycol and polypropylene glycol structures. Polyether acrylate has good flexibility and yellowing resistance, but poor mechanical strength, hardness and chemical resistance. Therefore, it is not used as the main resin in light-curing coatings and inks, but it has low viscosity and good dilution, so it is used as Active diluent.

This report studies the global Polyether Acrylic Resin production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Polyether Acrylic Resin, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year.
