Abstracts

Polyethylene terephthalate glycol (PETG) is a high-impact material produced from thermoplastic co-polyester which provides remarkable clarity and light transmission with high gloss in addition to impact resistance at low temperatures. PETG is used in a variety of packaging, industrial and medical applications.

The term copolyester defines thermoplastic saturated polyester whose synthesis uses more than one glycol and/or more than one dibasic acid. The main ones are PCTA copolyester and PETG copolyester. Unlike PCTA, which is acid-modified, PETG can be made by combining cyclohexane dimethanol (CHDM) with PTA and ethylene glycol, resulting in a glycol-modified polyester.

Scope of the Report:

This report focuses on the Polyethylene Terephthalate Glycol (PETG) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

According to the manufacturing process, PETG can be mainly divided into three categories: extruded grade PETG, injection molding grade PETG and blow molding grade PETG, of which each has been widely used in certain fields. In 2017, demand from Food & Beverage field accounted for the largest consumption share, which held 37.75% market.

Eastman has three manufacturing sites to produce PETG: USA plant mainly offers PETG to North America, UK plant caters for European PETG demands while Malaysia

plant offers PETG primarily for Asian region. Besides, PETG major customers of SK Chemical come from Japan, China and so on.

We tend to believe that this industry still has a bright future, considering the current demand. As for product prices, the slow downward trend in recent years will continue in the next few years, since competition intensifies gradually and more companies have intention to enter into the industry.

The worldwide market for Polyethylene Terephthalate Glycol (PETG) is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
