According to our (Global Info Research) latest study, the global Polyimide Films market size was valued at USD 2045.6 million in 2023 and is forecast to a readjusted size of USD 2382.3 million by 2030 with a CAGR of 2.2% during review period.

Polyimide film is a monorphic polymer and an advanced polymer material. Because it has a very strong molecular structure, its performance is extremely high among many polymers. Very strong, excellent heat resistance, and excellent electrical insulation. In addition, as organic matter has a low rate of expansion relative to heat, even when used at high temperature, the dimension error caused by expansion can be prevented. It is a film that is often used for temporary use in high temperature, such as masking of a packaging substrate.

Global Polyimide Film (PI Film) key players include DuPont, Kaneka, SKC Kolon, etc. Global top three manufacturers hold a share over 70%.

Japan is the largest market, with a share about 40%, followed by United States and China, both have a share about 40 percent.

In terms of product, Pyromellitic Type is the largest segment, with a share about 100%. And in terms of application, the largest application is Consumer Electronics, followed by Aerospace.
